7200 Bano universal washbasin without grab bar

Bano universal washbasin without grab bar and height adjustment

This washbasin can be installed free standing on a wall or in combination with a side cabinet. The washbasin provides plenty of space for hygiene articles. In addition, it is 600mm deep with a flat base to ensure good access for wheelchair users.

We recommend installing the washbasin with a 52094 Bano outflow pipe next to the wall.

The washbasin is adapted for use with the 5808 Bano washbasin tap, which is described in a separate product sheet.

Load tested up to 300kg.

Materials

- Washbasin: crushed marble with gelcoat surface
